# MÖBIUS

FOCUSED CONSULTANCY, MEASURABLE BENEFITS

## Expect Results

- Are your lean processes creating added value?
- Would your business be able to handle a major product recall?
- Are you keeping up with demand with a good forecasting plan?
- Is your supply chain running as effectively as possible?
- Is the company keeping up with change in industry?

MÖBIUS UK is an independent supply chain management consultancy. We are specialists in decision-making and supply chain management. We typically employ state of the art quantitative models, the latest thinking in change management and best practice project management.

We are driven by passion and nothing matters more to us than our clients. All of our energy is focused on giving you exceptional service to cope with the changing environment our clients face. We look at a company's performance as a whole and devise a realistic strategy to improve the way a businesses' current supply chain is operating.

## Focused Consultancy, Measurable Benefits!

## Put Your Trust In Us

We have a strong reputation within this industry and clients work with us because we are knowledgeable, professional, innovative, dependable and furthermore trusted to deliver real improvements to your supply chain.

What gives us the edge over our competitors is our people, our passion, our values and our commitment to seeing a project progress from start to finish, and the intangibles that make it happen.

To ensure we can help, our supply chain consultants always offer free consultations, at a time and place that is convenient for you. We will not commit to a project unless we are certain we can improve your supply chain. Whether you would like your free consultation at your work place or would rather meet and discuss over a coffee, we will tailor this unique service to your needs.

Our team is composed of high level supply chain management consultants with a mix of industrial experience and a variety of academic and technical backgrounds. 90% of the MÖBIUS project managers are Prince2© certified and many also possess other certifications such as PMI, Six Sigma or ITIL.

We pride ourselves on the opportunities we create for our people to learn and grow through active coaching, in-house research projects and knowledge sharing. We want our clients to become the best in their industry!

# Our Capabilities...

## Pharmaceuticals

MÖBIUS' objective and systematic approach has helped our clients in the pharmaceutical sector to increase the efficiency of their research and development activities and increase demand forecast accuracy. In addition, simulation models have been developed to optimise asset utilisation and inventory allocation.

## Chemicals and Process Industries

MÖBIUS has worked with clients in the oil, bulk/commodity and specialty chemicals sectors, modeling and optimising processes and implementing sophisticated planning tools.

## Automotive

As well as developing business games to raise business and supply chain planning capability, MÖBIUS has built models to optimise inventory, simulate production and logistics flows and manage supply chain risk for a range of vehicle manufacturers and component suppliers.

## Aerospace

Working with clients throughout the industry, MÖBIUS has assisted in both the delivery and recovery of major programmes as well as optimising maintenance and repair activities.

## High-tech and Electronics

By providing the tools and capabilities to make better decisions and to act earlier, with fact-based knowledge, MÖBIUS enables clients to stay ahead of the competition and consistently add value and grow their businesses.

**MÖBIUS has been trusted to deliver real improvements to an organisation's supply chain!**

- Enterprise Risk Management

## The Support & Improvements We Have Made...

### Automotive

Due to the success of a new model, a famous UK car manufacturer has recently experienced a large increase in demand. To cope with this extra volume, they started recruiting which also meant inducting and training the new recruits and giving them an understanding of the culture and values of the organisation, and in particular the importance of cross-functional communications. Knowing that we have the right experience in Sales and Operations (S&OP) Processes and building business games, we were asked to help with the training of this.

Together, we have defined a configurable game, which can be played over and over again to raise S&OP capability and understanding throughout their business.

### Building Materials

A supplier of construction materials had experienced quite some changes over the past few years, so to be sure they could cope with the road ahead, they needed an assessment of their UK/IE logistics network.

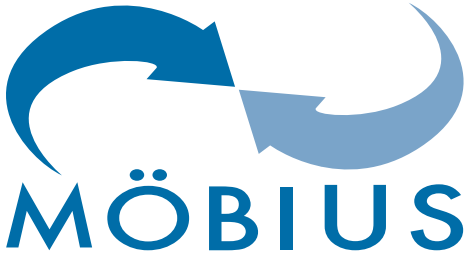

We carried out a process and capacity scan of the relevant parts of their supply chain and suggested improvements, taking into account the current boundaries of the UK/IE supply chain, logistic feasibility and costs.

### Global FMCG

A global FMCG wanted to assess which supply chain software was best suited to their business.

We provided the necessary expertise for them to gain not only an insight in the different vendor's solutions, but also how these would fit into in the overall business strategy.

REAL IMPROVEMENTS TO YOUR SUPPLY CHAIN
